

Figure 1: Schematic representation of the experimental design. The figure shows a timeline of events for two groups: 'Control' and 'Experimental'. The 'Control' group receives a 'Control stimulus' (a blue bar) and a 'Control response' (a green bar). The 'Experimental' group receives an 'Experimental stimulus' (a blue bar) and an 'Experimental response' (a green bar). The 'Control' group also receives a 'Control stimulus' (a blue bar) and a 'Control response' (a green bar). The 'Experimental' group also receives an 'Experimental stimulus' (a blue bar) and an 'Experimental response' (a green bar). The 'Control' group also receives a 'Control stimulus' (a blue bar) and a 'Control response' (a green bar). The 'Experimental' group also receives an 'Experimental stimulus' (a blue bar) and an 'Experimental response' (a green bar).
